

Broadcast Technician

Full-Time

Do you want to be part of a team that is working on new and emerging technologies? Do you have video experience as well as a passion for the technical aspects of Television? The Television landscape is changing with much more reliance on IT technology. This field is changing and we are looking for someone who wants to change and grow with it. Our team is collaborative and focused on our goals. If this sounds like a place where you can thrive we would love to hear from you.

This is a full-time position where shifts are generally days but may include occasional evenings, nights and on-call.

Key Responsibilities:

- Set up and troubleshoot satellite transmissions, multiplexed signals and automation system operations for multiple broadcast streams and High-Definition channels
- Effectively communicate with manager, master control operators, vendors, clients and management on all issues affecting the transmission of channels
- Troubleshoot and maintain various Broadcast servers, computer servers, and Non-linear editing systems used in Digital media workflows
- Troubleshoot and repair of traditional broadcast equipment such as video, master control switchers, routing switchers, and supporting infrastructure
- Assist in the installation and commissioning of new facilities and/or addition or modification of existing facilities
- Keep manager informed on all repairs and maintenance issues or other matters affecting operations
- Update and maintain drawings and create new ones for assigned projects
- Perform routine and preventive maintenance of computer systems and networks
- Provide support of Master Control operations
- Other duties as assigned

Key Qualifications:

- Broadcast Engineering Diploma/Degree or relevant experience in a broadcast engineering capacity
- Ability to work under pressure, make sound decisions and find effective solutions
- Competent technical ability to perform basic troubleshooting of both standard and high definition broadcast video/audio signals, with sound understanding of a variety of automation systems and video path flow
- Ability to work with multiple platforms (Linux, Windows 64-bit systems and Mac OSX) troubleshoot issues and test updates
- Excellent multitasking skills and great attention to detail
- Excellent analytical skills and ability to problem solve
- Willing and enthusiastic about learning new technologies
- Must work well in a team environment at the same time work well under minimal supervision

Please send your résumé and cover letter in confidence to careers@chz.com quoting reference BT-2023-01
